

	Allegiance: AUTOBOT	Name: Aurora	Subgroup: Throttlebots
	Function: Scout		Prime.Colour: White
	Quote: " Seeing is, by itself, not enough for believing.		Secd.Colour: Blue
	Bio: A creature of the night. Cruises the Earth with the curiosity of a cat. Nothing is too insignificant or irrelevant to escape his notice. Quiet, serious; a loner. Top row of headlights equipped with stereoscopic digital video cameras, spectroscopic chemical analyzer, and radiation detector. Bottom lights can produce strobe effect, full color spectrum with blinding 10,000 watt brightness. Combines with fellow Throttlebots.

Technology & Character Notes:

- Carry: To have the Carry ability is to store, lug or piggy-back 1 Robot of the same Size or 1 Size greater.
- Sensor, Infrared Visual: +2d Surveillance, specifically against Espionage attempts to sneak or hide. Visual sensors are unaffected by lighting conditions up to Medium Range.
- Sensor, Radar/Sonar: +1d Surveillance. Detect Medium Range material objects, test Salvage for strength, heat resistance, elasticity, detect Energon Levels (quantity and intensity), detect electronic, ionic, magnetic, sonic, or chemical anomalies, know the density and composition of objects, tensile strength, energy and Function of objects and Robots
- Stereo Speakers: Broadcast 80 dB of dazzling light and sound. Communications vs. opposing Courage to all Robots in Medium Range to force a Stall effect
